

European Laminate Flooring
Style. Quality. Simplicity.

Why choose Balterio?

1

Strength & durability

Wear-resistant surface layer, HDF Core

- Surface made up of melamine resin reinforced with aluminium oxide, one of the hardest mineral compounds known to man. Able to resist staining, fading, surface moisture, scratches, cigarette burns, stiletto marks and general wear and tear.
- Core made from HDF (high density fibreboard), as opposed to the MDF core (medium density fibreboard) that many competitors use. HDF is a stronger and more stable board, more resistant to punctures from sharp objects or sudden pressure and much less likely to swell if in contact with water.
- Balterio laminate flooring is much harder and more wear-resistant than real wood flooring.

2

European style & quality

Quality product made in Belgium

Balterio laminate flooring is made in Belgium and is a well established brand worldwide. The Balterio R&D team follow the latest flooring trends globally and locally and use advanced technologies to replicate the look of real wood floors.

Balterio offer advanced features such as extra long and wide planks, with or without bevels and a variety of different surface effects to replicated different types of real wood flooring finishes. Not to mention a huge range of colours and styles to choose from; there is something to suit everyone!

3

Low maintenance

Quick and easy to clean

Simply vacuum and give your floor a light mop with slightly damp pad using an approved laminate floor cleaner, and your Balterio laminate floor is sure to keep its lovely appearance for years.

Please note we do not recommend the use of steam mops on this flooring.

4

Low repeat pattern

For a more authentic looking floor

Balterio laminate flooring has a very low repeat pattern ratio compared to most other laminate brands. Patterns are repeated as little as every 10 boards, ensuring your floor looks as authentic as possible.

5

Underfloor heating

Great for floor heating

Balterio laminate floors have 3x better heat conduction ratings than the industry requirement and are suitable for use with most under floor heating systems.

6

Long-lasting warranties

For your peace of mind

Balterio offers a lifetime* warranty on integrity of the click joint systems. Balterio also offers the market both residential and commercial warranties. Most competitors only provide residential warranties.

* max. 33 years

Environmentally conscious

Balterio cares about the environment

- All Balterio laminate floors are PEFC-certified to ensure the preservation of our forests. For each tree that is used in the production process, another one is planted.
- Balterio laminate floors contain 10 times less formaldehyde than the required European Standards.
- Balterio laminate flooring can be re-used; since it is usually floated on an underlay, it can be uplifted and laid in another area if you wish.
- Balterio have created a program called 'Embrace the future' where they go to great efforts to reduce or avoid waste and where possible to recycle and re-use it. A good example is their own bio mass power plant in which they convert waste material into energy for their production process. At the moment more than 90% of the energy used during the production process comes from their own power plant.

8

Easy to install

Unique clicking systems that make installation simple

We recommend Balterio to be floated over an underlay. Balterio's unique and award-winning locking systems ensure that installing your laminate floor a breeze. Watch the installation video at www.balterio.com or scan the barcode below for more information.
